

SilentDrive® Garage Door Opener

Engineered for
a lifetime of excellence

Convenience, Quietness, Security

The Hörmann SilentDrive® garage door opener brings you the latest in German engineering and manufacturing excellence. All SilentDrive® openers are built with a DC motor and a composite aramid fiber reinforced belt drive system that provide a very quiet operation, dramatically enhancing your total quality experience. The adjustable “soft” start and “soft” stop feature allows minimum wear on the door and opener, ensuring a quiet-running door at every stage of opening and closing. With a SilentDrive® opener you benefit not only from the safety features compliant with UL 325 requirements but from the unique Hörmann Beltension Guard™ and the EngageLock™.

No matter which SilentDrive® opener suits your needs, you will never compromise on quality.

- Maintenance free
- Ultra smooth and quiet
- Energy-saving
- Door security device
- Compliant with UL 325

Maintenance Free

Beltension Guard™

All Hörmann SilentDrive® garage door openers come with the unique Beltension Guard™ built into the opener rail, to maintain proper belt tension for the life of the opener. This ensures quiet, trouble-free operation, and eliminates costly and inconvenient service calls.

Ultimate Security

EngageLock™

All Hörmann SilentDrive® garage door openers come with the unique EngageLock™ built into the opener rail. It eliminates door back drive action in the event of a power loss, securing your home and property.

Durable and Quiet

Aramid Fiber Reinforced Belt

Hörmann's unique aramid fiber reinforced belt will not rust, limits wear & tear, resists moisture and never needs lubrication. This special belt system provides a quiet ride and many years of worry free operation.

SilentDrive® 8500 Series

- Ultra quiet performance
- Long-lasting
- Maximum convenience
- Unique safety features
- Accelerated opening
- For doors 12' high

Standard Accessories

Reliable safeguard

The safety beams safeguard the bottom of the door with sensors which stop and reverse the door if an object breaks the path of the beams, to prevent damages to people and property.

Intelligent motion guard

On encountering an obstruction, the opener stops and reverses the door immediately to eliminate possible hazards. The opener is self-testing and also self-adjusting, eliminating the need for maintenance.

Deluxe Wall Console Station

Operates the door from inside your garage and independently operates opener lights. A separate on/off switch for "vacation mode" allows you to disable the garage door opener for extended periods of time.

Mini transmitter

The convenient size transmitter allows you to control up to four separate doors.

Optional Accessories

Single button transmitter

Used as an additional device for operating a single door.

Wireless keypad

Lighted and covered keypad allows for easy remote access to your garage without wiring, with your own programmable personal security code. Stores up to 3 personal codes.
